ZANTEK™

We make IT easy

SAGE Energy consolidates business information to increase efficiency and reduce costs

"All of our data is in the same place so there's no criss-cross of information between users and locations. We're more efficient with SAP Business One and we have a clear view of our operations so, for example, we'll transfer inventory between warehouses instead of ordering more stock from the vendor."

David Nguyen
SAP Analyst
SAGE Energy Corp.

SAGE Energy Snapshot

- Head office: Calgary, AB
- Products: gas and speciality compressor packages, vapor recovery systems, natural gas generators
- Services: maintenance, compressor optimization, product overhauls, operator training
- Customers: oil and gas companies
- Employees: 75

Everything in one place with SAP Business One

SAGE Energy, a leading packager of gas compressors for the oil and gas industry, outgrew its accounting software. The company needed to centralize all of its critical business information so it can be accessed by users in multiple locations. Zantek worked closely with SAGE to tailor a business management solution to their needs using SAP® Business One.

Objectives

- Seamlessly access real-time inventory information, including customer commitments, across multiple warehouses
- Run comprehensive reports in less time
- Eliminate manual accounting processes

Why SAP Business One

- A well-supported program from a highly-reputable software developer
- Data for all business functions is integrated into a single program
- Designed for small and mid-size businesses

Why Zantek

- A local partner with Calgary-based clients
- A good fit and solid track record of understanding business needs and tailoring technology solutions
- An experienced SAP Business One partner

Benefits

- Reduced costs through more efficient inventory management
- Instant access to accurate reports and ability to drill-down to details
- Customizable business intelligence using Coresystems' fully-integrated add-on
- Streamlined accounting process with customer-specific rules to reduce costing and invoicing errors
