

Top 10 reasons to engage Zantek for your infrastructure needs

1	Single point of accountability	Zantek takes responsibility for all aspects of the project – no miscommunication or finger pointing
2	Expert knowledge	We are SAP Business One experts so there will be no mistakes in designing the appropriate IT infrastructure
3	Less risk	Project risk will be reduced by dealing with Zantek for your IT infrastructure and SAP Business One needs
4	Less chance of delays	With Zantek managing all aspects of the project, hardware will be delivered on time ensuring no project delays
5	Reduced project management fees	No additional project management fees to collaborate with an outside vendor on hardware purchase, delivery and installation
6	Tier-one hardware vendor	Zantek is a Preferred Partner of Dell, a tier-one hardware vendor with a reputation for quality and timely delivery
7	Reduced complexity	Your staff won't have to deal with the complexity of specifying and purchasing equipment that may not be familiar
8	Reliable remote management tools	Today's networks can be configured and managed remotely with only minimal on-site time required for initial installation
9	Managed services offering	Ongoing, real-time network monitoring proactively identifies and resolves issues to minimize downtime
10	Simplified leasing	It's much easier to have a lease approved and administered if you are dealing with one supplier

We make IT easy!
